Subject: Microsoft Settlement

I believe that the Microsoft settlement is very fair and that this whole antitrust matter with Microsoft should be resolved as expeditiously as possible. I believe that as one of the United States premier software and technology providers Microsoft has not injured any consumers and that in fact Microsoft continues to help and assist U.S. consumers on a daily basis. I utilize Microsoft products myself on a daily basis and I find them to be excellent products with a reasonable cost. I believe that the U.S. government should STOP harassing Microsoft as further legal actions against Microsoft hurts consumers and our U.S. economy.
